Shiny hair alert!

BY RANI SHEEN | AUGUST 6TH, 2009 | 11:04 AM

CHLOÉ FALL 2009. PHOTOGRAPHY BY PETER STIGTER

Going out on a limb, I'll assume we all kinda want a curtain of swingy, shampoo-commercial hair, glowy, dewy skin and unbreakable, glossy nails. Sometimes a deep conditioner, twice-yearly facial and occasional cuticle treatment just isn't enough to ensure that beautiful trifecta, and a little internal support is required.

It's tricky to get all of the nutrients required for such loveliness in the standard workweek cereal-salad-stir fry diet, which is where a good nutritional supplement comes in. Try the new Hair, Skin & Nails supplement from Canadian company femMED, which has on its team medical doctors, natural healthcare professionals, pharmacists and master herbalists. Each non-horse-pill-like tablet contains high-

functioning health enhancers such as hyaluronic acid, amino acids, calcium, silicon and vitamins C, A, D and a couple of Bs. Say goodbye (or at least à bientôt) to breaky nails, rough skin and even thinning hair.
