Weekly Hot New Things

FemMED Multi + Antioxidants

It's no secret we are huge fans of [FemMED](#) in the Women's Post office, but we have been taking the [Multi + Antioxidants](#) for over a month and it truly is making a difference. We all feel more alert, energized and seem to be remembering details better. It's the perfect multi-vitamin for women on the go! And it does not contain dairy, egg, gluten, yeast, artificial colours or flavours.

Travel Nail Polish Remover

I am a former nail biter as are the majority of my friends. We have discovered the perfect (yet disgusting) way to keep from biting our nails. We apply nail polish every week, with the intent to pick it off, in the event of a craving to bite our nails. Problems arise when I'm on my way to a meeting and have four chipped pomegranate coloured nails. That's why I need these [pocket polish](#) removing wipes that can fix my nails quickly and I don't need to carry around a bottle of remover! They're also perfect for travelling.

Ultrasonic Jewellery Cleaner

I once worked at a very popular jewellery store in Toronto. I won't say which one but I did leave my position owning a couple of really amazing pieces of silver and gold. Since I no longer get free cleaning at the store, I needed a new way to clean my pieces for cheap. I found this personal [Ultrasonic cleaner](#) that I can use at home. It generates 42,000Hz of ultrasonic sound waves that remove dirt and dust particles from rings, bracelets, and necklaces without manual scrubbing or harsh chemicals: and it does it quietly.
